

# JACK FLAXTON

## Digital Artist

Having aced Art and Graphic Design at college I decided to push myself into the next dimension by taking 3D Animation at University, with the most prestigious course in the UK.

I am an expert with Photoshop, proficient with the Adobe Creative Suite, and trained in the industry leading 3D visualization program Autodesk Maya. I also have experience using the programming & scripting languages: C++, html, CSS, Python, OpenGL & mel, and am confident in any video editing software package.

The bulk of my freelance work has involved creating illustrative artwork, event flyers/posters, photo manipulation/retouching, motion graphics and digital design.
